Thesis title here

Mary Wang

submitted in partial fulfilment of the degree of

Bachelor of Science, with Honours

at the University of Otago, Dunedin,

New Zealand.

June 23, 2026

Abstract

Put the abstract in this file

Acknowledgements

Put the acknowledgements in this file

Contents

List of Tables

List of Figures

Chapter 1

Introduction

This is the first chapter. Here is an example citation: Rountree (1998).

Chapter 2

Literature Survey

Chapter 3

A New Approach

Chapter 4

Implementation

Chapter 5

Results

Chapter 6

Conclusion

References

Rountree, N. (1998). *How to do Anything.* Dunedin, New Zealand: Non-existent Publishers.

Appendix A

Source Code for thesis.dvi

You do not need to include the source code for your thesis (this is just an example). However, including code you have written to solve numerical problems can be useful – talk to your supervisor.

A.1 thesis.tex

```
%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%
%% This is a document template for an Otago thesis (Masters or PhD).
%% A skeleton chapter layout is also suggested.
%%
%% Look in the directory example_document for filled-out chapters
%% that show you how to do figures, bibliographies, and tables.
%%
%% Since this was written for Computer Science at Otago University,
%% Harvard (author, date) style citations are used.  Other students
%% should consult their advisors as to what style of citations to use.
%%
%% This template was created by Nathan Rountree 9/2/98
%% Updates have since been made by others in the department.
%%
%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%

%%
%% In the style of a technical report, in 12pt and one sided.
%% Start chapters on right hand side pages only.
%%
\documentclass[12pt]{report}
%%\documentclass[12pt,twoside,openright]{report} %% Use this for twosided.

%%
%% Load packages.
%%
\usepackage[bschons,nolibrary]{otagothesis}     %% Use Otago page layout
%% Use [bschons] for BScHons thesis
%%     [msc]     for MSc
%%     [phd]     for PhD
```

```
%%     [dipsci]  for PGDipSci
%%  nolibrary-option omits a library declaration form.

\usepackage[longnamesfirst,round]{natbib} %% Use Natural Sciences bibliography

\usepackage[T1]{fontenc} %% assist clipboard copy from PDF; allow < | > etc.
\usepackage[utf8]{inputenc} %% allow UTF-8 conent in source files

%%\usepackage{times}             %% Times PostScript font. Don't use
                                 %% if thesis contains lots of math.

\usepackage{graphicx}            %% jpg, gif, tiff, and pdf graphics
